Handbook of the International Political Economy of Migration (Handbooks of Research on International Political Economy Series) (Elgar Original reference) Leila Talani, Simon McMahon

'This superb Handbook provides an indispensable guide to what is arguably the most serious political and humanitarian crisis of our time. Including chapters by numerous leading scholars in the field of migration studies, the Handbook is distinctive not only because of its international political economy orientation, but also because of its comprehensiveness: the Handbook combines sustained theoretical and conceptual engagement as it engages with the most important migration crises in North America, Europe, and Asia.'

- Alan Cafruny, Hamilton College, US

'An excellent book on one of the most pressing issues of our time: international migration. By bringing together the dominant approaches in the literature, and applying them to a broad spectrum of migration problems, this book sets a standard for academics and policymakers.'

- Stefan Collignon, London School of Economics and Political Science, UK, Sant'Anna School of Advanced Studies, Italy and University of Hamburg, Germany

'The editors have amassed an impressive range of international experts on the political economy of migration to create an invaluable teaching resource on the subject for many years to come.'

- Vassilis K. Fouskas, University of East London, UK

This *Handbook* discusses theoretical approaches to migration studies in general, as well as confronting various issues in international migration from a distinctive and unique international political economy perspective. With a focus on the relation between globalization and migration, the international political economy (IPE) theories of migration are systematically addressed.

Original new contributions from leading migration scholars offer a complete overview of international migration. They examine migration as part of a global political economy whilst addressing the theoretical debates relating to the capacity of the state to control international migration and the so called 'policy gap' or 'gap hypothesis' between migration policies and their outcomes. An examination of the relationship between regional integration and migration, with examples from Europe, North America, the Middle East and North Africa, as well as South-East Asia - is also included.

Aimed at political scientists and political economists with an interest in globalization and EU policymaking this collection will be accessible to students, academic and policymakers alike.
