When Lauck wrote **The Tactical Marksman** in 1996, it quickly became a sought-after training manual for police, military and civilian marksmen alike. Now one of the most respected names in high-performance shooting and gunsmithing refines and updates that information. Dispensing with overcomplicated mil-dot formulas and minute-of-angle calculations, Lauck shows you how to achieve superior accuracy and figure out angle shots, streamline the zero process, hit targets at 2,000 yards, deal with dawn and dusk shoots, train for real-world scenarios, choose optics and accessories, create a mobile shooting platform and much more.
