Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Metabolomics enables valuable information about the biochemical composition of foods to be rapidly obtained. Since the biochemical profile of food largely determines key food properties such as flavour and shelf life, the information gained using metabolomics-based methods will enable greater control of food quality and also help to determine the relationship between diet and health. Metabolomics in food and nutrition provides an overview of their current and potential use in the food industry.

Part one reviews equipment, methods and data interpretation in metabolomics including the use of nuclear magnetic resonance (NMR), statistical methods in metabolomics, and metabolic reconstruction databases and their application to metabolomics research. Part two explores applications of metabolomics in humans, plants and food. Chapters discuss metabolomics in nutrition, human samples for health assessments, and current methods for the analysis of human milk oligosaccharides (HMOs) and their novel applications. Further chapters highlight metabolomic analysis of plants and crops, metabolomics for the safety assessment of genetically modified (GM) crops, and applications of metabolomics in food science including food composition and quality, sensory and nutritional attributes.

With its distinguished editors and team of expert contributors, Metabolomics in food and nutrition is a technical resource for industrial researchers in the food and nutrition sectors interested in the potential of metabolomics methods and academics and postgraduate students working in the area.

- Provides an overview of the current and potential future use of metabolomics in the food industry
- Chapters focus on key applications and review the analytical methods used and the bioinformatics techniques involved in processing the results
- Discusses metabolomics in nutrition, human samples for health assessments, and current methods for the analysis of human milk oligosaccharides (HMOs) and their novel applications

From reader reviews:

Ruth Brinkman:

Your reading sixth sense will not betray anyone, why because this Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) book written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written throughout good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still skepticism Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) as good book not merely by the cover but also with the content. This is one book that can break don't ascertain book by its protect, so do you still needing another sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.

June Hargrove:

Is it a person who having spare time then spend it whole day by means of watching television programs or just laying on the bed? Do you need something totally new? This Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) can be the respond to, oh how comes? A book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a nerd activity. So what these ebooks have than the others?

Justin Pritchett:

You may get this Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) by look at the bookstore or Mall. Simply viewing or reviewing it could to be your solve difficulty if you get difficulties on your knowledge. Kinds of this publication are various. Not only by means of written or printed but also can you enjoy this book through e-book. In the modern era including now, you just looking from your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose suitable ways for you.

Douglas Brownlee:

A lot of publication has printed but it differs from the others. You can get it by internet on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever by simply searching from it. It is named of book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition). You can include your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make anyone happier to read. It is most crucial that, you must aware about e-book. It can bring you from one spot to other place.
