The Car in 2035: Mobility Planning for the near Future

The Car in 2035: Mobility Planning for the near Future

The Car in 2035: Mobility Planning for the Near Future focuses on the car, the street, and public policy in Southern California. In this collection of essays and images, the car is viewed as both a challenge and benefit to our neighborhoods, cities, and suburbs. Despite rising fuel prices, the automobile will be Southern California's primary form of transportation in 2035 because the region's population will continue to be dispersed widely, and the car offers the best access to the area's tremendous diversity of economic, social, recreational, and cultural opportunities. But the infrastructure will need to accommodate a heterogeneous mix of modes of transportation, including more cars on the road than today.
