The Chemistry of the Non-Metals (Outline Studies in Biology) P. Powell

This book is a new attempt to interrelate the chemistry of the non-metals. In the early chapters, simple compounds of the non-metals with the halogens, hydrogen, and oxygen are surveyed, permitting a large area of chemistry to be discussed without the burden of too many facts. The structural relationships in the elemental forms of the non-metals are then used as an introduction to the catenated compounds, including the boron hydrides. In the concluding chapter, selected heteronuclear chain, ring, and cage compounds are considered. In some chapters, we have thought it useful to outline important features of a topic in relation to chemical theory, before giving a more detailed account of the chemistry of individual elements. The book is certainly not comprehensive and the bias in the material selected probably reflects our interest in volatile, covalent non-metal compounds. Suggestions for further reading are presented in two ways. A selected bibliography lists general textbooks which relate to much of our subject matter. References in the text point to review articles and to a few original papers which we consider to be of special interest. Although there are few difficult concepts in the text, the treatment may be appreciated most by students with some previous exposure to a Group by Group approach to non-metal chemistry. We have assumed an elementary knowledge of chemical periodicity, bonding theory, thermodynamics, and spectroscopic methods of structure determination.

From reader reviews:

Sherry Stevens:

Nowadays reading books be than want or need but also become a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want drive more knowledge just go with training books but if you want experience happy read one using theme for entertaining for instance comic or novel. Typically the The Chemistry of the Non-Metals (Outline Studies in Biology) is kind of publication which is giving the reader capricious experience.

Frances Oberlin:

This The Chemistry of the Non-Metals (Outline Studies in Biology) are reliable for you who want to be considered a successful person, why. The explanation of this The Chemistry of the Non-Metals (Outline Studies in Biology) can be one of several great books you must have is giving you more than just simple reading through food but feed anyone with information that might be will shock your preceding knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this The Chemistry of the Non-Metals (Outline Studies in Biology) giving you an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day action. So , let's have it and revel in reading.

Rebecca Kendrick:

A lot of people always spent their particular free time to vacation as well as go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent that they free time just watching TV, or playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a new book. It is really fun in your case. If you enjoy the book that you just read you can spent all day every day to reading a e-book. The book The Chemistry of the Non-Metals (Outline Studies in Biology) it is rather good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy typically the e-book. You can m0ore easily to read this book through your smart phone. The price is not very costly but this book possesses high quality.

Darren Perez:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specially book entitled The Chemistry of the Non-Metals (Outline Studies in Biology) your head will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will end up your mind friends. Imaging just about every word written in a book then become one application form conclusion and explanation that maybe you never get before. The The Chemistry of the Non-Metals (Outline Studies in Biology) giving you another experience more than blown away your mind but also giving you useful details

for your better life with this era. So now let us explain to you the relaxing pattern this is your body and mind will probably be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary spending spare time activity?
