Liver Radioembolization with 90Y Microspheres (Medical Radiology)

Liver Radioembolization with 90Y Microspheres (Medical Radiology)

This vital text for oncologists and radiotherapists provides an in-depth account of all aspects of radioembolization, a relatively novel technique based on the efficacy of radiotherapy for the treatment of liver tumors. Radioembolization combines embolization (intravascular deployment of particles – microspheres loaded with yttrium-90) and brachytherapy (local administration of radiotherapy), thereby allowing delivery of high doses of beta-radiation specifically to the tumoral area.
