China's basic work units, collectively known as the *danwei* system, have undergone significant reform, particularly since 1984. The author examines how this system operates and how reform is generating change in the party at grassroots level.

The author demonstrates how China's post-Mao reforms have produced a quiet revolution from below as the process of political and economic liberalization has accelerated. This book presents new research findings that will be invaluable to those wishing to understand the nature of change in China.
