Dynamics and Control of Process Systems 2001 (2-volume set) (IFAC Proceedings Volumes) J.H. Lee, En Sup Yoon, George Stephanopoulos

This Proceedings contains papers presented at the sixth IFAC Symposium on Dynamics and Control of Chemical Processes (DYCOPS 2001), which was held on Jeju Island, Korea, on June 4-6, 2001. The triennial DYCOPS symposium is one of IFAC's highest-profile regular events, and has established an enviable reputation for quality. The reputation and coverage of DYCOPS ensures that these events always provide a comprehensive showcase of the best and latest research into all aspects of process control.

DYCOPS-6 had as its theme "Bridging Engineering with Science," and explored how the process control community should react to wider developments in chemical engineering research, where molecular-level phenomena and product design as related to materials and biotechnology are becoming increasingly important.

Featuring papers by many of the world's leading experts in process control, the Proceedings of DYCOPS-6 form an indispensable resource for process control engineers and for chemical engineers seeking to understand the latest developments in chemical process control. Altogether over 100 papers are presented, on topics such as batch process control, model predictive control, control of distillation columns, fault detection, and many others.

From reader reviews:

Robert Glass:

Nowadays reading books are more than want or need but also work as a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book this improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with knowledge books but if you want feel happy read one with theme for entertaining like comic or novel. The Dynamics and Control of Process Systems 2001 (2-volume set) (IFAC Proceedings Volumes) is kind of reserve which is giving the reader capricious experience.

Leroy Torres:

Playing with family inside a park, coming to see the sea world or hanging out with good friends is thing that usually you might have done when you have spare time, subsequently why you don't try matter that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Dynamics and Control of Process Systems 2001 (2-volume set) (IFAC Proceedings Volumes), it is possible to enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't have it, oh come on its referred to as reading friends.

Miguel Penix:

Are you kind of stressful person, only have 10 or even 15 minute in your moment to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are having problem with the book in comparison with can satisfy your short period of time to read it because all this time you only find book that need more time to be examine. Dynamics and Control of Process Systems 2001 (2-volume set) (IFAC Proceedings Volumes) can be your answer as it can be read by you actually who have those short time problems.

Eric Valentine:

What is your hobby? Have you heard in which question when you got students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important in addition to book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update about something by book. Amount types of books that can you choose to use be your object. One of them is this Dynamics and Control of Process Systems 2001 (2-volume set) (IFAC Proceedings Volumes).
